

BICK CONSULTING COMPLETES DATA CENTER ASSESSMENT FOR CITY OF FORT WORTH

St. Louis, MO - February 20, 2015. Bick Consulting Services completed a data center assessment for the City of Fort Worth, Texas.

The City of Fort Worth's data center supports many operations for the city. There was concern whether facility improvements should be made and how to prioritize them. Bick provided 39 recommendations with corresponding budgets, the degree of difficulty to implement each, and comparative priorities across all.

"For decades Bick has helped clients ascertain risk and prioritize needs across multiple disciplines - architectural, electrical, mechanical, fire protection and systems," stated Tad Davies, SVP, Bick, who led the engagement. "However, we do so in the context of the client's business need as well as what is practical risk-acceptable to implement".

For more information, please contact Tad Davies, SVP, tdavies@bickgroup.com 314-265-2735.
