

## **DCI Issues 5 Bold Predictions for the Data Center in 2019**

St. Louis, MO – February 5, 2019. AFCOM's Data Center Institute issued what will be an annual paper addressing future predictions about the data center titled "5 Bold Predictions for the Data Center in 2019".

The Data Center Institute is the think tank of AFCOM that focuses on the emerging trends around innovation, technological change, macro-economic shifts, and workforce dynamics shaping the data center and IT infrastructure industry worldwide.

Tad Davies, Principal, Bick Consulting Services, along with other DCI members co-authored the paper. "It was an invigorating experience considering, debating, and ultimately deciding on those issue we felt mattered today" reflected Davies. "I was honored to participate and contribute with these data center veterans whose collective experience totals hundreds of years."

The paper can be accessed from <https://technology.informaengage.com/5-Bold-Predictions-Data-Center-2019>.
